

Suniva Announces Linear Power Performance Warranty

Norcross, Ga. – Sept. 29, 2011 – [Suniva, Inc.](#), a U.S. manufacturer of high-efficiency [monocrystalline silicon solar cells and modules](#), today announced a 25 year linear power performance warranty for its solar modules. In addition, the company also increased the workmanship and module product warranties to 10 years.

The company also announced that its high-power density OPT260 solar modules are now available in an anodized black frame with black back sheet, offering the residential market a solution to better complement residential rooftop installations, while maintaining its 16 percent module level efficiency performance.

The Suniva 25-year linear performance warranty guarantees that solar module power output shall not decrease by more than 0.7 percent per year after the initial year of service. By the end of the 25th year, the linear performance warranty guarantees that actual power output will be no less than 80 percent of nominal power output. The new warranty program provides greater assurances to customers that Suniva products will deliver predictable high-power output through the lifetime of their solar system, enabling them to bank on extra power output.

About Suniva

Based in metro-Atlanta, GA, Suniva® manufactures high-efficiency monocrystalline silicon solar cells and high-power solar modules using patented low-cost techniques. Led by an internationally regarded team of business executives and photovoltaic scientists, the Company leverages exclusive licenses to critical patents and patent-pending intellectual property developed by founder and CTO Dr. Ajeet Rohatgi at the Georgia Institute of Technology's University Center of Excellence for Photovoltaic Research, which is funded by the Department of Energy. Suniva sells its advanced solar cells and modules worldwide and is dedicated to making solar generated electricity cost competitive with fossil fuels. For additional information on how Suniva is making solar more sensible in the global market, please visit www.suniva.com.
