

Suniva Partners with PetersenDean on Solar 4 America Campaign
Celebrates Six Years as America's Leading Solar Manufacturer

Norcross, Ga. – October 22, 2013 – Suniva, Inc., a metro-Atlanta based manufacturer of high-efficiency crystalline silicon solar cells and modules, is proud to announce their partnership with PetersenDean on the Solar 4 America Campaign. The campaign is PetersenDean's newest initiative to make solar affordable for everyone while reinvesting in America with American-made products.

As part of this American manufacturing partnership, Suniva's American-made products will help strengthen PetersenDean's commitment to reinvest in America. The companies are collaborating to ensure energy saving across the nation.

"We made a decision at PetersenDean to only source our products from North America. It's costing us a little more money to buy these panels, but we are supporting the American economy, we are supporting the American worker and we're reinvesting those dollars back in America," said Jim Petersen, Founder of PetersenDean. "It's that simple. I want to make sure that our products stand the test of time and that our customers are happy with it. And that's why we choose to go American. It is time to take matters into our own hands. And that's what Solar4America is all about. It is about lowering our electric bills. It is about creating our own energy policy. It is about American jobs, American panels, reinvesting in America."

"Suniva is delighted to partner with PetersenDean on this new energy saving campaign. As the leading U.S. manufacturer of solar modules, our high-powered modules will help fulfill their goal of reinvesting in American-made products. Progressive thinkers like Jim Petersen and his team are proving every day that high-quality American solutions and products cannot only compete – but win – in a marketplace full of global competitors. This partnership brings more jobs back home, which is a win for all of us" said Matt Card, vice president global sales and marketing of Suniva.

Suniva will be exhibiting in booth # 2415 at Solar Power International 2013 in Chicago. Stop by the booth to learn more about the latest in the company's high-quality services and products.

About Suniva: Suniva® is the leading American manufacturer of high-efficiency crystalline silicon photovoltaic (PV) solar cells and high-power solar modules. The company is known for its high-quality products, industry-leading technology, reliability and high power density. Headquartered in metro-Atlanta, GA, Suniva sells its advanced PV cells and modules globally. Suniva.com
